

The Unstoppable Cooler Kits and Exhaust Fans for your home. They go on & on & on

WHY BUY AN INDOMA COOLER KIT OR EXHAUST FAN

We at INDOMA, understand your needs and also your environment. We are aware of the need of a robust, durable, heavy duty motor that can survive the intermittent & inconsistent power and still work cool to keep you cool.

QUALITY

Heavy gauge metal & high quality winding.

SUPERIOR FINISH

Special quality powder coating to give long lasting finish & corrosion resistance.

LVS

Designed to run on low voltages & fluctuations too.

ENERGY SAVER

Saves time, saves energy, saves money

MADE FOR INDIA

Designed for Indian conditions. The motor works cool & keeps you cool.

- 3 Speed motors are designed for 1250/1310/1375 RPM
- Low voltage start of 80-100V for cooler kits.
- Temperature Rise under 60°C after 6 Hours running on load
- Every motor undergoes 3 Stage testing to ensure a trouble free long life.
- Designed specifically for Indian climate conditions.

INDOMA - KNOW US BETTER

We at INDOMA always believe in doing something different. We understand our country and our peoples' needs. We revolutionized the desert cooler industry in 2002 by introducing **Littelpump** the world's first submersible pump for cooler industry. We also brought the world's first shock safe immersion rods and have recently launched revolutionary HAWA HAWAI coolers for the scorching Indian summers.

Understanding the needs, we have developed these motors for robust heavy duty usage for all consumers whether it be rural environment or cosmopolitan.
