

# REVOLUTIONIZING The Desert Cooler Industry YET AGAIN!

## WHY LITTELHOME COOLERS ARE A MUST BUY

For the first time, you can get portable effective cooling and that too with a compact beautiful design. Whether it be for your homes, shops, puja rooms, hostel, kitchen, or the morning tea in your balcony, you can enjoy great cooling on all those scorching summer days.

### PORTABLE

With its light weight, You can pick up from its handle and carry conveniently

### ENERGY SAVER

With just 40W/80W power consumption, you need not worry about high electricity bills

### CFM PADS

The ultra-efficient CFM pads ensure cooling even in hottest of temperature

### AFFORDABLE

With low initial & running cost, It'll never pinch your pocket. 40W means about Rs.1.6 per day\*\*.

### RUNS ON INVERTER

In case of power failure, easily runs on inverter. This cooler consumes less electricity than a ceiling fan.

Pump	220V, 50Hz, 4W	220V, 50Hz, 18W
Tank Capacity	14 Ltrs.	25 Ltrs
Suitable For	10' x 12' Room Size	20' x 12' Room Size
Dimension	15.5" x 11" x 22"	15.5" x 11" x 31"

## INDOMA - KNOW US BETTER

We at indoma, always believe in doing something different. We base our business on the FANAFI (find a need and fill it) principle. Though air coolers have found a need in every house in india, we realized the need for a truly portable cooler.

The bulky size of coolers limits their usage. Littelhome coolers are a must have for all hostels, shops, puja rooms, kitchens, every home. We see a potential use of our coolers in every household of india, whether it be the rural markets or the cosmopolitan cities.

This is not the first time INDOMA has done something different. It revolutionized the desert cooler industry earlier in 2002 by introducing  the world's first submersible pump for the cooler industry.

We also brought in the world's first shock safe immersion rods which are safe and have changed the industry.

## WE ALSO BROUGHT TO YOU THE REVOLUTIONARY
